Mode button

Pressing Mode Button changes the current mode in **Zapper**

Current mode is shown in the top line of the LCD

Pressing **MODE** changes the current mode from 'Pulser 4 Hz' to 'Pulser 16 Hz' to 'Pulser 100 Hz' to 'Zapper 2128 Hz' to 'Zapper 10 KHz' to 'Zapper 30 KHz' to 'Silver' to 'Pulser 4 Hz' and go on.

Pressing the  " Switch will start output with respective mode selected and also shows the Time on last line as per mode selected and "ON" in case of Zapper mode.

Pulser and Silver mode is timer based mode time can be toggled between 10 Mins. or 20 mins. 

Any mode can be changed \ stopped by pressing Mode switch.

Mode Summary

Mode	Output	
Pulser 4 Hz	-30V to 30V AC, 4Hz Timer (10 Mins / 20 Mins)	Use dry handkerchief to hold copper pipe if current is strong.
Pulser 16 Hz	-30V to 30V AC, 16Hz Timer (10 Mins / 20 Mins)	Use only 1-2 minutes if it is strong.
Pulser 100 Hz	-30V to 30V AC, 100Hz Timer (10 Mins / 20 Mins))	
Zapper 2128 Hz	0 V to 9 V AC, 2128 Hz Timer (14 Mins. Fix cycle of Normal and Reverse)	
Zapper 10 KHz	0 V to 9 V AC, 10 KHz Timer (14 Mins. Fix cycle of Normal and Reverse)	Hold copper pipe in towels soaked in salty water
Zapper 30 KHz	0 V to 9 V AC, 30 KHz Timer (14 Mins. Fix cycle of Normal and Reverse)	
Silver Normal	30 V DC Timer (10 Mins / 20 Mins)	No restrictions
Silver Reverse	-30 V DC Timer (10 Mins / 20 Mins)	

N.B.:- Output of all above modes are w.r.t Black probe as –ve potential output and Red as +ve potential output

Note

1. Usage of cell is not needed if you are using regular power supply. This option of cell has been given only because in India at some places we don't get regular power supply. Colloidal silver making needs a lot of electrical power. It will be very costly to use cell. Therefore use only electrical power supply for making colloidal silver water.
2. Always detach all cables from the terminals and turn off the unit after each use, to prevent drain on the cell.
3. Do not touch the two terminals \ copper rods \ silver sticks to each other with the unit switched on, in order to prevent shorting of the cell and draining it.
4. Use cell only for pulser/zapper when electricity supply is not possible

Troubleshooting Guide

Display is blank	There is no cell in the Unit or cell is weak.
Display cannot be read or shows strange characters	Cell may be weak.
Pulser is not giving the pulses	Check electrode continuity. Check cell weak condition/ symptom is shown on the display
Pulser pulses are too weak	Remove the cell and replace it again. Maintain good surface area contact with electrodes
Silver substance is not seen in the water	Kindly connect AC Adaptor to the Unit. Use of Cell under Silver mode may not give proper result

Technical Specifications

Cell: 9 V PP3 Box type

DC power: 9V DC 600mA, 3.5 mm neg. center pin

Outputs

Pulser mode à 30V DC Biphasic or 60 Vpp AC

Silver Mode à 30V DC

Zapper Mode à 9V DC

Frequency Accuracy within 2.5% of selected frequencies. (this is sufficient for our parasite treatment)

Procedure for Parasite Cleanse

I recommend doing a liver cleanse first to observe its effect before using a zapper and/or parasite tincture of Clarkia. After that, it is recommended to do a liver cleanse again every two weeks till all stones are eliminated. Later on, just one liver cleanse every 6 months is sufficient to compensate for pollution and wrong food habits (cooked food).

While using this Zapper / Pulser, choose any frequency or frequencies at random and see the effect on your body. Pulsar emits mild direct current of low frequency.

Pulser

The micro current stimulation helps the body's natural electricity for more energy and greater health.

This model is an approximate equivalent of Tripulser New Zealand (Colloidal Silver Generator, Zapper, Magnetic Pulser All in one) costing approximate \$298 (Rs.20000) or RSG – 1 Combo USA \$ 338 (Rs 22000)
